

POLICY-MAKERS EVENT

“National eInfrastructure: Networking and Informational Services for Research & Education” was held in Chisinau, Moldova, 16 April 2008. The Policy-Makers Event “National eInfrastructure: Networking and Informational Services for Research & Education” was held in Chisinau, Moldova, on April 16th 2008. The event was combined with the Bit+2008 International Conference and supported by the Conference organizers - the Ministry of Informational Development of Moldova and the Academy of Sciences of Moldova (ASM). The round table workshop was organized by the Research and Educational Association of Moldova (RENAM) in the framework of European Commission SEE-GRID-2 project (South-East European GRID e-Infrastructure Development). At the workshop had participated more than 20 attendees that represented governmental authorities, members of MD-Grid NGI Consortium, universities, research institutes and other interested organizations. Agenda of the event envisaged five presentations and open discussion. Invited speaker Dr. Gabriel Neagu from the Institute of Research in Informatics (ICI, Bucharest, Romania) presented special report on GRID infrastructure and services development in SEE region. The event presentations had outline current state of grid computing in Moldova and the necessity of national-level programs and financial support for electronic infrastructure at a country level, in order to complement the EC initiatives. Main topics were focused on rising awareness of national policy makers in the thematic of eInfrastructure and modern informational services development. ”
