

EGEE'09 conference

The EGEE'09 conference was held at the hotel Barcelo Sants in Barcelona between 21-25 September 2009, with a number of participation of more than 600 delegates. Dr. V.Sidorenco, leading specialist of RENAM, represented Moldova at the forum. From EGEE to EGI The transition to EGI was a major theme for the conference, echoed throughout the presentations, the exhibitions and demos, and the broader conference sessions. A poster was presented during posters session, entitled: EnviMon " data acquisition and processing application for Environment monitoring (by V. SIDORENCO, P.BOGATENCOV, A.GOLUBEV, D.GORGAN and I.BORTA). The abstract of poster is available here. More info: EGEE09 Blog EGEE is teaming up with the GridTalk project to bring you live news from the conference on the GridCast blog. We have already started to post our pre-conference blogs in the run up to the event. Catch up on the latest posts at gridtalk-project.blogspot.com. If you would like to be a featured blogger contact Catherine Gater Catherine.Gater@cern.ch. All you need is an e-mail address and an interesting point of view. Conference pictures You will find EGEE09 tagged pictures on Flickr. You can also visit the EGEE Flickr site for more photos and images from EGEE. EGEE'09 on Twitter Follow us on our Twitter account at twitter.com/enablinggrids. If you would like to tweet about the event or follow it live, use the #egee hashtag. Demo videos The EGEE'09 demos are available as videos from our YouTube site at youtube.com/EnablingGrids.
